

# HOW TO BUILD YOUR EUROBAR?

## STEP 1: SELECT FROM PRE-CONFIGURED MODELS

We've simplified the process with 3 pre-configured bar layouts available in 75 , 78 , and 84 Inches. These models include Main Station, Juice Well, Bottle Well Drawer, Side Speed Rail and Ice Bin.

|                       | EBPCU75<br>75" PRE-CONFIGURED UNIT | EBPCU78<br>78" PRE-CONFIGURED UNIT | EBPCU84<br>84" PRE-CONFIGURED UNIT |
|-----------------------|------------------------------------|------------------------------------|------------------------------------|
| Juice Well            | 6 bottles                          | 6 bottles                          | 6 bottles                          |
| Bottle Well Drawer    | 5 bottles                          | 5 bottles                          | 5 bottles                          |
| Side Speed Rail       | 4 bottles                          | 5 bottles                          | 6 bottles                          |
| Ice Bin               | 15 Inches                          | 18 Inches                          | 24 Inches                          |
| Storage Cabinet Space | 5 sq. ft.                          | 6 sq. ft.                          | 7 sq. ft.                          |

*\*See page 21 for additional specification for each model.*

## STEP 2: SELECT CUSTOM MODULES TO COMPLETE YOUR BAR

Create your unique EuroBar layout by selecting from our list of custom modules to complete your design. Either add these modules to the pre-configured model or mix and match modules for a complete customized bar station.

### CUSTOM MODULE LIST

|                              |                              |             |
|------------------------------|------------------------------|-------------|
| Main Work Station            | Underbar Liquor Display      | Soda Gun    |
| Ice Bin w/ Speed Rail        | Blender Station w/ Dump Sink | Hand Sink   |
| Dump Sink                    | Underbar Free Space          | Spice Caddy |
| Drain Board w/ Storage Shelf | Trash Bin Cabinet            |             |

*\*See page 21 for additional specification for each module*
