WHY EUROBAR?

100% CUSTOMIZEABLE

Fully Customizable: Modular design allows operators to personalize their EuroBar with as many modules as needed, in various sizes, to suit their unique operations.

QUALITY CONSTRUCTION

Made with 304-grade stainless steel, the EuroBar is easy to sanitize and wipe clean, and resists rust and corrosion. Proudly made with 14-gauge top / 18-gauge sides.

DESIGNED FOR EFFECTIVENESS

All EuroBar stations provide bartenders with ample storage for ingredients and small wares thanks to their cabinet bases. This extra storage enables them to create a broader range of beverages while eliminating unsightly objects in the view of bar patrons.

DESIGNED BY AN EXPERT BARTENDER

All EuroBar stations are designed by internationally acclaimed bartender Livio Lauro who has trained thousands of bartenders. Livio has spent over three decades working alongside the foremost global hospitality groups helping them put together successful bars and profitable cocktail programs.

RECESSED SPEED RAIL

By recessing our speed rails bartenders can easily prepare drinks without the speed rack pressing into their knees.

TALLER UNITS

Easy to work on: Our taller units reduce the need for the Bartender to hunch down

ABOUT EUROBAR

EuroBar is a cutting-edge bar equipment company with three unique bar stations that have been designed by renowned cocktail expert Livio Lauro and an impeccable line of backbar coolers. All the EuroBar stations represent the perfect blend of a European simplicity and American effectiveness.

What makes a bar European designed?

Traditional European designed bars include cabinet base throughout, consistent height and depth to create clean lines, and a clever way to organize smallwares.

OUR THREE BAR STATIONS SAMPLE LAYOUTS

EuroBar | *Classico*™

EuroBar | *Sportivo*™

EuroBar | *Alto*™

FEATURES:

- The *Classico* Main Workstation includes:
 - Six integrated iced condiment trays
 - Rinser and drainboard
 - Rectangular dipper well
 - Trash chute with internal trash can (sold separately)
 - Eight bottle quick-grab drawer
 - Cabinet base for storage
- Consistent height of 32" and depth 24" for seamless integration with other EuroBar units
- Corrosion resistant 304 grade stainless steel throughout
- Durable 14-gauge top / 18-gauge body
- Dry waste chute at arm's reach
- Cabinet fits a 41 qt / 10-gallon trash bin
- Ice bin module is set to the side of the prep area preventing any spilling of ingredients or contamination into the ice
- Includes two recessed hand towel and bar rag caddies. The bottle drawer allows the bartender to easily prepare drinks without the speed rack on the main station pressing into knees and legs (or pour spouts rubbing on their pants).

EUROBAR | CLASSICO™

The perfect blend of European design and American efficiency.
