

Comprehensive Guide To Installing EuroBar Equipment

Overview

Installation Guide for Stainless Steel Bar Equipment

Stainless steel bar equipment, such as sinks, shelving, countertops, and cabinets, is essential for a functional and professional bar setup. Proper installation ensures safety, efficiency, and durability.

Follow this step-by-step guide for a smooth installation process.

Unpack the Equipment

- Carefully unpack all items and inspect them for damage or missing parts.
- Remove protective film from stainless steel surfaces.

Plan the Layout

- Refer to the bar's floor plan and measure the installation area.
- Mark the locations for each piece of equipment, ensuring they align with plumbing and electrical connections if applicable.

Prepare the Surface

- Clean the installation area to remove debris.
- Ensure floors and walls are level for proper alignment.

Install Bar Sinks

- Place the sink in its designated location and ensure it aligns with plumbing fixtures.
- **All equipment is to be installed with adequate backflow protection to comply with applicable federal, state, and local codes.**
- Attach bar equipment to the wall using the wall clips that are provided
- Connect Plumbing: All plumbing components are shipped loose for installation by certified plumber on-site.

Install Bar Equipment Modules

- Place them according to the floor plan and use a level to ensure alignment.
- Adjust equipment feet if necessary to ensure proper alignment
- Attach modules to the wall using wall mounting clips that are provided
- **All equipment is to be installed with adequate backflow protection to comply with applicable federal, state, and local codes.**

Inspect the Installation:

- Check that all equipment is level, secure, and properly aligned.
- Verify that plumbing and electrical connections are functional.
- Apply silicone sealant as needed to any seams in compliance with local health department requirements.

Clean the Equipment

- Wipe down all stainless-steel surfaces with a damp cloth to remove fingerprints and debris. Refer to the cleaning and maintenance guide for more detailed instructions.

Test Functionality:

- Run water in sinks, open and close cabinets, and test shelving for stability.

Dispose of Packaging

- Recycle or dispose of packaging materials responsibly.

Maintenance Tips

- Refer to the cleaning and maintenance guide for more detailed instructions
